SILICONE PRINTING, DEMOCRATIZED.

FREE FORM.

INDUSTRIAL & MEDICAL GRADE.

**1** Silicone 3D printing

**2** Independent dual extrusion technology

**3** Compact industrial design

**4** Open ecosystem

Made in France

# APPLICATIONS

EPITHESIS

SURFACE TREATMENT MASK

PROTECTIVE DEVICE

SEAL

ORTHOPAEDIC INSOLES

SOFT ROBOTICS

# MATERIALS

## LIQUID
Silicone, PU, epoxy

— **Silicone**
RTV2 medical (5, 10, 25, 40 shA)
(ISO 10993-05 certified)
RTV2 industrial (45 shA)

— **Polyurethane***
Industrial (50 to 80 shA)

— **LSR***

— **Epoxy***

*coming soon

# SPECIFICATIONS

| Build volume | Nozzle diameter | Toolheads |
|---|---|---|
| 300x250x200 mm | Ø0,23mm to Ø1,04mm | Independent dual extrusion |
| **Layer height** | **Dimensions** | **Health and safety** |
| 50µm à >1mm | l 1000 x L 629 x H 887 mm | Closed Filtered environnment |
| **Calibration** | **Support** | **Heated chamber** |
| Automatic | Soluble material | Yes |
