About Us

with over 25 years of knowledge in dispensing solutions, we are available to assist you with your mixing, dispensing and fine-tune your processes. Our catalogue features the most advanced mixing technology available today, along with precision dispensing systems that provide consistent fluid applications, leading to enhanced accuracy, increased yields, decreased material expenses, improved process control, and a safer work environment.

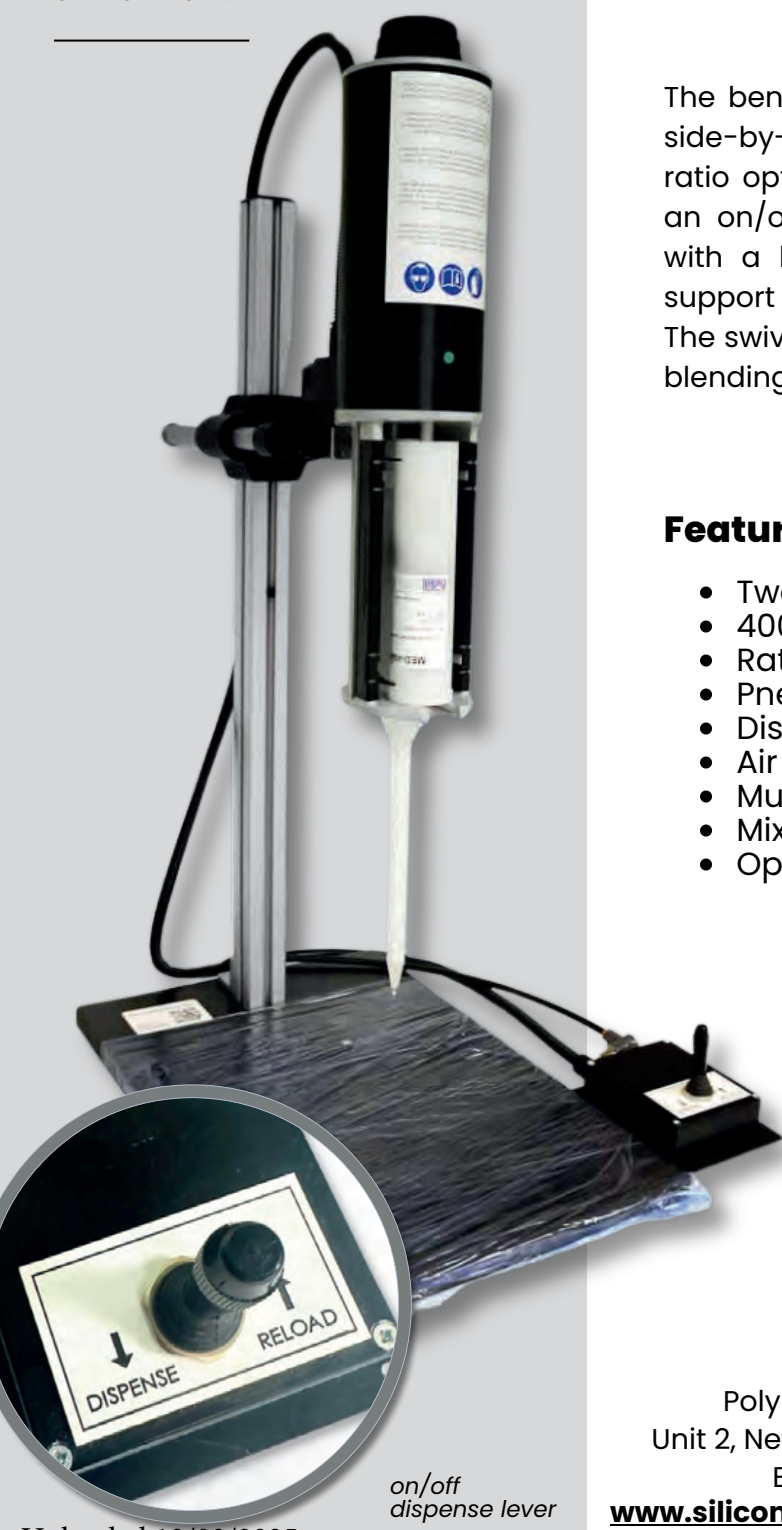

Dispensing Solutions

Two-Part Cartridge Pneumatic Dispensing Gun Stand

The bench top dual cartridge dispensing system for our side-by-side 200ml and 400ml cartridges with 1:1 or 10:1 ratio options, features a pneumatic dispensing gun with an on/off lever, flow regulator, and a bench-top stand with a hand switch for easy use. The adjustable gun support stand allows for vertical and swivel adjustments. The swivel function primes the mixer and ensures efficient blending through static mixing.

Features & Benefits

- Two component side by side cartridge dispensing
- 400ml & 200ml Cartridges
- Ratio 1:1, 10:1
- Pneumatic dispensing gun
- Dispense lever on/off
- Air regulator for flow control
- Multi-axis gun support
- Mixing by static mixer
- Optional footswitch
